

# Top 9 Data & Information Sharing Must-Haves **Scorecard**

	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
<b>Item Master Data</b>	Lack of integrated data, inconsistent data	Proprietary data system	Full GS1 integration and implementation
<b>Location Master Data</b>	Lack of integrated data, inconsistent data	Proprietary data system	Full GS1 integration and implementation
<b>Shipment Data - Inbound &amp; Outbound</b>	Limited visibility & accuracy	Accurate and available as needed	Real-time visibility, High degree of accuracy
<b>POS Data - store level</b>	Nothing	Batch, consolidated, ad-hoc	Real-time, portal or online access
<b>Inventory Levels</b>	Fluctuating levels, too much/too little, shortages, inefficient	Process or system has limitations that cause fluctuations	Just-in-time, maximizing turns, no shortages
<b>Purchase Orders - Restaurant/Distributor</b>	Ad-hoc, incomplete, fax/manual	Ineffective system, process or skills set	Timely, complete, electronic/EDI+
<b>Lead Times</b>	Minimal, insufficient	Sufficient with some lack of consistency	Sufficient, consistent and realistic
<b>Forecasting</b>	Poor inputs, lack of accuracy, poor process integration, limited track record, lack of skill, incorrect ownership	Ineffective system, process or skills set	Integrated process, proven accuracy, timeliness, track record of success
<b>Capacity</b>	Poor understanding & use, strained capacity	Acceptable with limited projections	Understanding, optimizing, predicting
